

SYSTEM AND METHODS FOR  
INTERACTIVE WAGERING

Abstract of the Disclosure

5 The present invention is systems and methods  
for interactive wagering. Preferred embodiments of  
these systems and methods incorporate a wagering data  
hub which controls the flow of data relating to wagers,  
wagering events, and wagering account and facilitates  
the use of a variety of user interfaces such as  
10 graphical user interfaces and interactive voice  
response interfaces. For example, a user of the  
present invention may use a television set-top box, a  
computer, a telephone, and/or any other suitable  
device. To communicate with the wagering data hub,  
15 television set-top boxes preferably use a two-way cable  
system, computers preferably use a computer network,  
and telephones preferably use a telephone network,  
although each may use any suitable mechanism or  
combination of mechanisms to communicate with wagering  
20 data hub.
